KIMSTEEL

KIMSTEEL

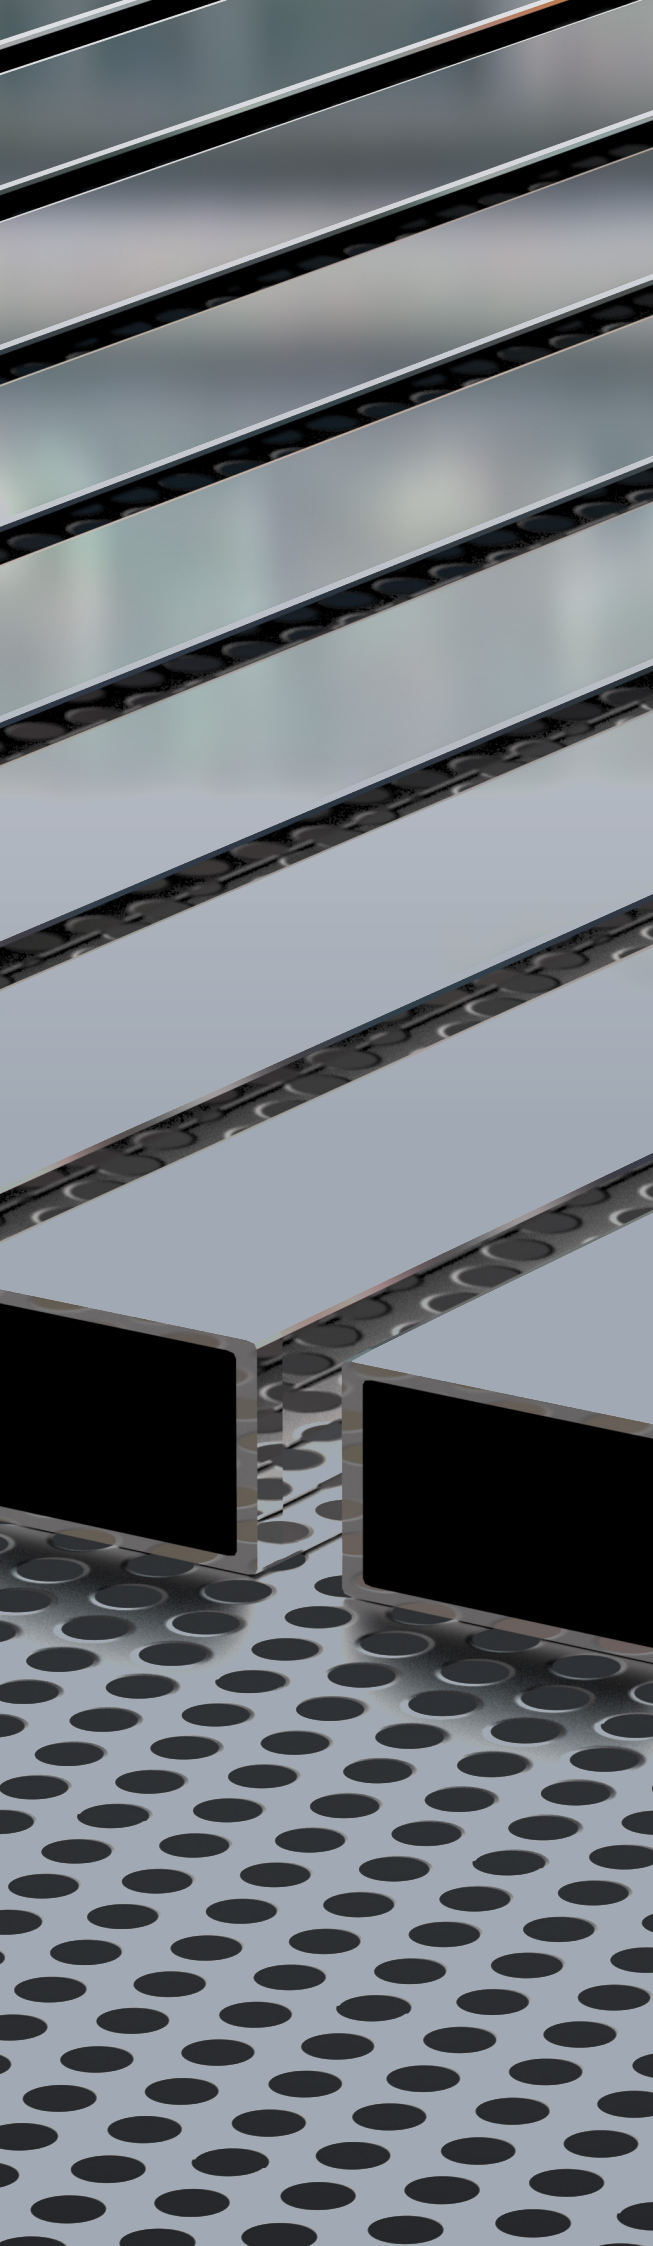

KIMSTEEL FOR A SUSTAINABLE LIFE

As KimSteel, we strengthen our position in the steel industry through both product quality and sustainability. Under “KimSteel for a Sustainable Life,” we support green steel and decarbonization with a strong commitment to environmental responsibility.

Using eco-friendly technologies, renewable energy, and a high scrap ratio, we reduce our carbon footprint and support the circular economy. With our Solar Power Plant projects, including one of the world’s largest rooftop installations, we are lowering energy costs and increasing the share of clean energy in our operations.

At our R&D Center, we develop sustainability-focused projects, improve processes, and explore hydrogen as an alternative fuel. Through innovation, recycling, and circular economy principles, we work to create a more sustainable future for the steel industry.

About Us

Kimsteel Viet Nam Production and Trading Company Limited is a reputable enterprise operating in the steel production and trading field, established with the goal of becoming a strategic partner in the steel material supply chain for the construction, mechanical, and industrial sectors in Vietnam and internationally.

From its very first days of operation, Kimsteel Vietnam has focused on investing in high-tech machinery systems, optimizing production processes, and building a team of skilled technicians to ensure products consistently achieve superior quality and meet the market's strict requirements with flexibility.

We specialize in manufacturing and supplying all kinds of square steel, serving a variety of needs from civil construction, industrial works, to mechanical processing and steel structures. Each product of Kimsteel Vietnam is quality-tested before reaching customers.

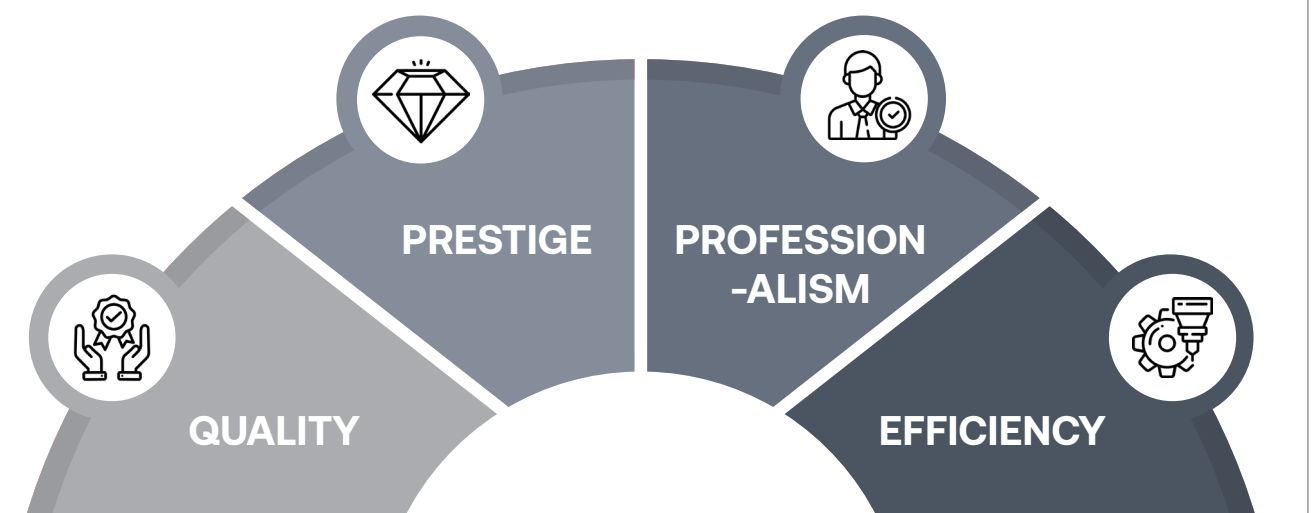

Vision

To become a leading steel brand in Vietnam, actively contributing to the sustainable development of the national construction and industrial sector.

Mission

Providing high-quality steel products, competitive prices, dedicated services, and optimal solutions for each customer's needs.

Core Values

Hot-Rolled Steel Tube

Large-sized HR steel tubes ranging from 100x100mm to 300x300mm with thicknesses from 2.5mm to 12mm, manufactured in accordance with JIS G 3466:2021 and ASTM A-500 standards.

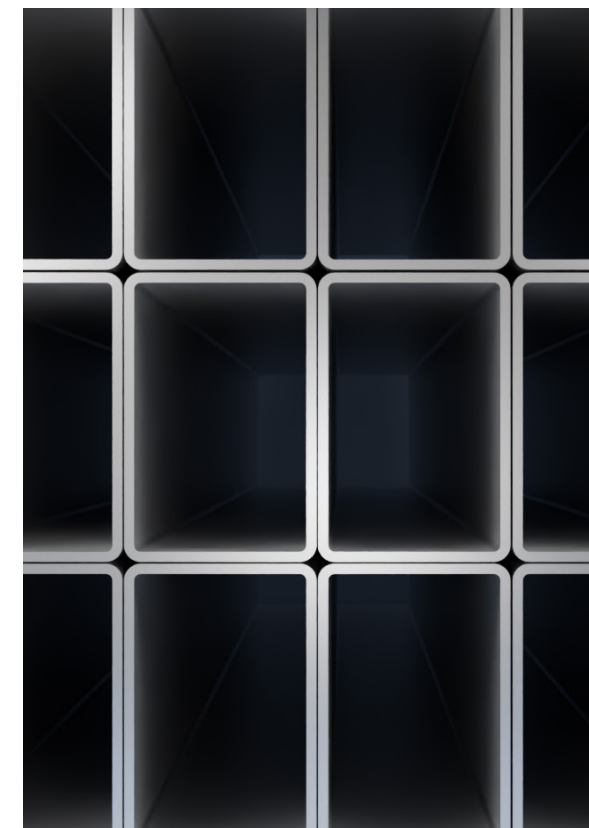

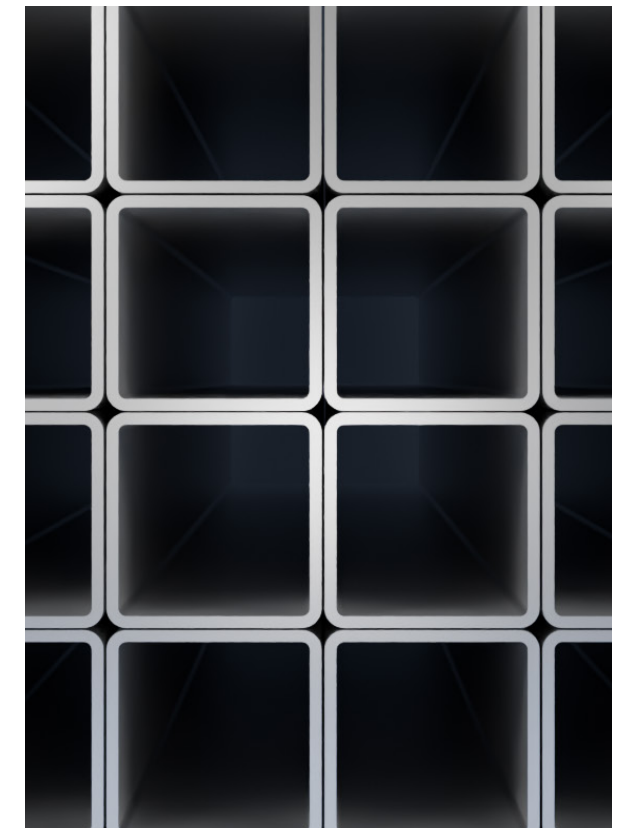

Technical Standards:

-  JIS G 3444:2015 JAPANESE INDUSTRIAL STANDARD
-  JIS G 3466:2015 JAPANESE INDUSTRIAL STANDARD
-  A53/A53M-12 AMERICAN SOCIETY FOR TESTING AND MATERIALS
-  ASTM A500/A500M-13 AMERICAN SOCIETY FOR TESTING AND MATERIALS

Square Tubes

100x100, 125x125, 140x140, 150x150, 175x175, 180x180, 200x200, 250x250, 300x300 (mm)

Rectangular Tubes

100x200, 100x300, 150x200, 150x250, 150x275, 200x300 (mm)

Small Size Section
